Why not RGB?

RGB is used for electronic devices (monitors, TVs) while printers use a CMYK process. We can convert your RGB file to CMYK, but it can result in some colours appearing washed out. We recommend creating your file in CMYK in the first instance so we can match your colours as closely as possible.

Save your file as a PDF

Email your file direct to **glasgow@nettl.com**

WE OFFER SAME DAY PRINTING...
...on many items in this buying guide. Look out for
the estimated turnaround time on each product.

FABRIC EXHIBITION DISPLAY & STANDS

Gone are the days of lugging around heavy cases. Goodbye to magnetic bars and crying, trying to hang graphics precisely. Say farewell to posters which don't last a second show.

There are many reasons people are choosing fabric displays.

They're lightweight – each comes with a carrycase. They're compact – fit them in

the boot of a car. They're robust – use them time and time again. They look great – a single continuous graphic in eye-popping high-definition. They're great value – they cost much less than you'd think.

Each display is a frame, which clips together. Then stretch a 'duvet' graphic over. Up in minutes, down in half that time.

WEBSITES SEO ECOMMERCE

Sell your delightful wares online with a new website or ecommerce web shop.

You're trying to win a new customer. You've intrigued them with a mailer or brochure. Or maybe they've seen the banner on your premises. Perhaps you've rubbed elbows at a networking event.

What do they do next? Probably Google you. And, almost certainly, look at your website. Why? For more information. For assurance. To decide if you're a credible outfit.

More than half of search is now from mobiles. Does your website work well on a smartphone? Is it easy for customers to buy, to book or to browse? Or is it time for an upgrade? To convert browsers into buyers.
